ABSTRACT

South Asia is among the most dangerous places in the world because of the unresolved conflicts of Kashmir. The rivalries between India and Pakistan, fueled by the historic animosity have triggered an arms race in South Asia, and now both countries have acquired nuclear capabilities raising concerns of a possible nuclear war in the Indian subcontinent. The focus of this study is to analyze the deep rooted rivalry between India and Pakistan. The conflict in the Indian subcontinent has remained unresolved, despite the engagement of the international community, regional organizations and the United States. As a result, there are concerns in the international community as the antagonism between India and Pakistan has put the entire South Asian region in the brink of nuclear war. Therefore, this study is significant because both India and Pakistan have shown their resolve to acquire and develop nuclear capabilities, while ignoring the international regimes on nuclear nonproliferation. This study was conducted to achieve the following objectives: firstly, to analyze the underlying factors that contributes to the development of the nuclear weapons by India and Pakistan; secondly, to identify the current contending issues that continue to constrain the relations between India and Pakistan; and finally, to study the threat posed to the region from nuclear weapons of the two country. The finding of this study suggests that the nuclear war between India and Pakistan is unlikely as both countries are committed to avoid a possible nuclear war in the subcontinent. However, a possible nuclear war cannot completely be ruled out as both the countries take pride in their nuclear programs. This study also revealed that any miscalculation from the policy makers in India or Pakistan could trigger a possible nuclear war between the two countries. Therefore, although Confidence Building Measures (CBMs) between India and Pakistan had failed in the past, this study suggests the establishment of an effective (CBMs) between the two countries to avoid an accidental nuclear war. The credibility of the Pakistan's government is critical to create a favorable environment between India and Pakistan.

LIST OF TABLES ix
LIST OF ABBREVIATIONS x

CHAPTER I; THE NATURE AND SCOPE OF STUDY

1.1 Introduction 1
1.2 Problem Statement 4
1.3 Research Objective 4
1.4 Working Hypothesis 5
1.5 Significance of Research 5
1.6 Theoretical Framework 6
1.7 Literature Reviews 7
1.8 Research Methodology 10
1.9 Limitations 11
1.10 Organization of Chapters 12

CHAPTER II: BACKGROUND OF THE CONFLICT AND NUCLEAR WEAPONS PROGRAM BETWEEN INDIA AND PAKISTAN

2.1 Background of India-Pakistan's Conflict 13
2.1.1 The Hindu-Muslim Antagonism 13
2.1.2 The Partition of India and Pakistan 16
CHAPTER III: THE DEVELOPMENT OF NUCLEAR WEAPONS PROGRAM IN INDIA AND PAKISTAN

3.1 Introduction 35

3.2 Indian Nuclear Weapons Program 36

3.2.1 Industralization Program in India's Early Nuclear Development 36

3.2.2 Nuclear Weapons for National Security Interests 38

3.2.3 Threat Perceptions 40

3.2.4 Nuclear Weapons for the Status 41

3.2.5 The United States’ Influence in India Nuclear Development 42

3.2.6 The United States’ Efforts on India Nuclear Non-Proliferation 45

3.2.7 Indian Nuclear Test of 1998 47

3.2.8 India's Nuclear Deterrence 49

3.3 Pakistani Nuclear Weapons Program 52

3.3.1 Pakistan's Early Nuclear Development 52

3.3.2 Pakistan's Desire for Stability 54

3.3.3 The Threat to Pakistan's Security 55
